MYNIC Second Level Doman Name (2LD) Public Launch

Written by Ben on March 24, 2008 – 11:43 am

REGISTER NOW FOR SHORTER INTERNET ADDRESSES

**Did you miss the priority entry period last year?
No worries! Public registration opens on Tuesday, 25th March 2008.**

Now you can register for our new shorter Internet address [companyname.my](#)

Why get a shorter address? Shorter Internet address will offer you the following :

1. You will gain an impactful identification mark within the global Internet community as it is easier to remember
2. You can span across any industry (as the name will no longer need any categorization of type of entity) to promote your products and services
3. You are protecting your intellectual property & brand name. Failure to register your name using shorter suffix [companyname.my](#) leaves it open for other entities/parties to take up the name, that may result in trademark issues later
4. It is faster and quicker for foreign Internet communities to recognize you as a Malaysian brand selling to the global market

This registration is open to the public and applications will be processed on a **FIRST COME FIRST SERVED BASIS**. **SO HURRY!** to secure your Internet address.

Register now to protect your organization's unique identity on the World Wide Web!
